
Welcome to the Bright Beginners

Hi, Welcome to the infant room “Bright Beginners”. My name is Deb Nilles and I will be your child’s teacher/caregiver at Riverview!

This Year we will work on so many new things!

Cognitive Development- This is the child’s ability to learn and solve problems.

Social and Emotional Development- This is the child’s ability to interact with others. Examples, 6-week-old baby smiling or 10-month-old baby waving bye-bye.

Speech and Language development- This is the child’s ability to understand and use language. Example, saying their first words.

Fine Motor Skill Development- This is the child’s ability to use small muscles, specifically their hands and fingers, to pick up small objects (Pincer Grasp)

Gross Motor Skill Development- This is the child’s ability to use large muscles. Example, 6-month-old baby learns how to sit up with some support, 10-month-old baby learns to pull up to a stand holding onto furniture.
